

Problem

Check [Tutorial](#) tab to know how to solve.

The included code stub will read an integer, `n`, from STDIN.

Without using any string methods, try to print the following:

Note that " " represents the consecutive values in between.

Submissions

Example

Print the string `123`.

Input Format

The first line contains an integer `n`.

Constraints

Leaderboard

Output Format

Print the list of integers from `1` through `n` as a string, without spaces.
